EXTENSION OF STREETS

The Commissioners Submit Reports on Fourteen Highway Bills.

The Proposed Improvements in "Misfit" Sub-Divisions North of the City -Tables and Maps Showing Routes and Estimated Cost - Plans in Detail - An Interesting Exhibit.

The Commissioners yesterday trans mitted to each of the District Committees in Congress their report on the several ing \$2,000.

"House bill 978, 'For the extension of bills for the extension of streets referred Le Droit Avenue and S Street.' This bill is double in that it provides for the openimprovement and extension of fourteen improvement and extension of fourteen separately. The more northerly one separate streets as follows. Kalorama Le Droit Avenue and it is proposed to Avenue, Wyoming Avenue, Colum-

Maps are enclosed with the reports showing the locations of the various streets named in the different tills. The larger number of them, the Commissioners say, He in the so-called 'missit' sub-divisions immediately north of the thy. Probably 50 per cent of the money to te expended on account of the extensions now authorized by law and those named in these bills is proposed to be used in a tension of this street through Le Dott territory less than 5 per cent of which is Park, upon the ground that the as-escovered by the plans for the permanent ment for benefits for the opening or exsystem of highways. A table is also transmitted, showing the names of the streets the same property owners that
which it is proposed to extend, the estimated cost of each, and the aggregate extension of Rhode Island Avenue. which it is proposed to extend, the esti-mated cost of each, and the aggregate

Most of the highways named in the pending bills correspond in location, the report states, with the streets p.uposed to be extended as originally laid down in the plan for a permanent system of high-ways, first section. The highways cutside of the first section correspond with one of the first section correspond, with one exception, Lyles Street, with the plans ow laid down for a permanent system of

estimate has not been made for the grad-ing of all the streets, but it can roughly be stated that \$100,000 will be needed for this purpose on the highways named in the pending bills. The grading of the highways whose condemnation has already been directed by acts passed at the last session of Congress will amount to much

sioners explain, do not contain the clause sioners explain, do not contain the clause which provides for levying assessments against abutting property which may be benefited for a portion of the cost of the condemnation of the streets. It is believed that this provision should be included in each of these bills, as it has been found one of the greatest safeguards. been found one of the greatest safeguards against extortionate awards by juries.

Sharing the Cost. The Commissioners feel that the portion of the cost not paid by assessments should be chargeable, one-half to the District of Columbia and one-half to the United

"Report was made some time ago upon the bill for the extension of Columbia Road, which has passed the House. Considerable care was expended in the preparation of a modification of the bill by a sub-committee of the House District Committee and the Commissioners, so as to have it form, if possible, a model bill for street exten-sions. This bill is, therefore, not included among those returned at the present time. It is believed that if the bill becomes a law in its present form it may be made to apply to pending and subsequent street extension bills and thus greatly simplify them, and much more rapid progress might be made in cases now before the court than is possible at present. "The estimated cost of the extensions

proposed by pending bills is \$748,038. Owing to the large amount called for by these bills and to the fact that the District revenues prior to July 1, 1961, may not be sufficient to meet all expenses, the Commisners feel that while the opening of Inese streets is a matter of great public importance, such action cannot be accomplished unless Congress adopts some method, by loan or otherwise, of raising the funds necessary to meet the additional expense involved.

Kalorama Avenue.

"The main advantage of this extension is the connection of Kalorama Avenue in the Commissioners' sub-division of Wash-from the appreciation of rent values. ington Heights proper. The point of ground between Columbia Road and Nine-teenth Street now projects in such man-ner that Kalorama Avenue east of Colum-

will be brimful of opportunities. Could you possibly spend it

more wisely than in satisfying your house's needs? It's high

time you were getting down your mattings and cheesing a refrigerator, and we have hosts of new styles and designs in

from California Avenue to Columbia Road, making a block 1.800 feet in length. This is entirely too long for a block and is

if possible, as the property will eventually become a park, and to have a park sur-rounded by back yards and woodsheds is something which should not be permitted. The property in this section is rapidly increasing in value and the recent improvements made in street car facilities for this section has caused much building be undertaken

'The cost of this extension is estimated at \$43,500, and of grading and macadamiz-

to them for consideration turns with the ing of two separate streets, either one of ent session. The report deals with the which may be considered and acted upon Avenue. Wyoming Avenue, Columbia Road, Le Droit Avenue and Street, Fifteenth Street, Seventeenth Street, Fifteenth Street, Seventeenth Street, Bacon Street, Fifth Street, Takoma, Welling Place, Vermiont Avenue, M. Street northeast, Lyles Place, Warder Avenue, etc., Eighth Street or Railroad cation would be easy, and it is believed that the opening up of this section to free communication would result in quite a large groups of this section to free communication would result in quite tend from Elm Street to the Howard Uni

S Street Extended.

"The extension of S Street proposed 1 from Le Droit Avenue westward to Rhode Island Avenue. A protest has been received at this office from a large number of pendents in S Street against the ex-

"The estimated cost of the land for the extension of Le Droit Avenue is \$37,350, and for the grading and macadamizing \$7,800. For S Street the estimated cost of the land is \$45,000, and for grading and

macadamizing \$3,000.

'House bill 7075, 'To widen F.f-teenth Street, or Columbia Avenue, in the District of Columbia. 'It will be noticed that the widening brings Columbia Avenue nearly in line with Fifteenth Street, but there will still remain a considerable jog in the roadway connecting Fifteenth Street with the wid-ened highway. The grade of the street is rather steep, and it cannot be reduced

except at an enormous damage to abutting the pending bills. The grading of the highways whose condemnation has already been directed by acts passed at the last session of Congress will amount to much more than the above sum, and no appropriation has, as yet, been made for grading these newly condemned streets, with a single exception.

Some of the pending bills, the Commissioner of the wide in the cost, but would be in the cost of the land to be common demanded in about \$45,600, and the damage to about 1945,600, and the damage to about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to improvements would be about 255,600, and the damage to about 255 lished in the city. An extension has al-roady been provided for Staughton Street and this proposed widening would in a measure, help the connection with Staughton Street, as a special provision is necessary for connecting the grades of the two streets. The proposed widening could be advantageously made of a width of fifty feet to Staughton Street, and it is recom-mended that the bill be changed accord-ingly

mended that the hill be changed accordingly.

"It is understood that there is a question as to the title of ownership of the tract known as 'Fox's Discovery,' which is the portion lying south of the north line of Florida Avenue prolonged. If this title is in the United States, or the District of Columbia, as it is believed to be, the estimated cost would be reduced about \$10,000. The estimated cost of grading this street is about \$3,000, which would make a total cost of about \$73,500.

make a total cost of about \$73,690.
"House bill 5041, Fifty-sixth Congress, inst session. For the extension of Sev-enteenth Street to the Walbridge sub-division of Ingleside.

This extension is more particularly a widening out of an existing street and the connection of isolated portions of a street. About a year ago an estimate was made to \$165,000; this estimate has been revised by certain parties interested along the line of the extension, one estimate being \$102,500, and another \$123,000. There is an extensive amount of grading neces-sary to place the proposed highway in passable condition, at one point the cut being in excess of forty feet. The estimated number of cubic yards of grading is \$7,000, which would cost in the heigh-borhood of \$22,000.

The opening of this street would it is refunds necessary to meet the additional genese involved.

"A separate report on each of said bills submitted, as follows:
"House bill 1046. For the extension of alorama Avenue."

"When the submitted is submitted, as follows:
"House bill 1046. For the extension of alorama Avenue."

"House bill total submitted as follows:
"House bill total submitted as follows:
"House bill total submitted submi is believed that the expense involved in the opening would soon be returned to the

> from the appreciation of rent values. Outlet at Bacon Street. "House bill 5492, "For the extension of

Bacon Street. bia Road is practically cut off from Kalorama Avenue west of Nineteenth Street, an awkward detour with a very sharp turn laving to be made to pass from one portion of the avenue to the other.

"The cost of the land to be taken is about \$25,500; the grading to be done is very slight. The nature of the improvement is very slight, and the improvement is not present a cul-de-sac. Bacon Street is no present a cul-de-sac or blind end, at a point 660 feet west of Pourteenth Street, and the object of this bill is to make a thoroughfare of it, to connect with Sixteenth Street. There is no point 660 feet west of Pourteenth Street, and the object of this bill is to make a thoroughfare of it, to connect with Sixteenth Street. There is no point 660 feet west of Pourteenth Street, and the object of this bill is to make a thoroughfare of it, to connect with Sixteenth Street. There is no point 660 feet west of Pourteenth Street, and the object of this bill is to make a thoroughfare of it, to connect with Sixteenth Street. ment is very similar to the one just ne-complished at Wyoming Avenue, included in the act passed at the last session of Congress for the widening of Nineteenth sub-division in which the street occurs, and it is believed advisable to make it at the

Street northwest, in Takoma Park, Dis-trict of Columbia."
"The object of the extension seems to is entirely too long for a block and is
the cause of great inconvenience. The
extension of Wyoming Avenue is particularly desirable, as it lies a convenient distance north of California Avenue, and it
will also cause the ground now owned
by the United States at this point to abut
on a street on the south, a condition
which it is believed should be obtained, with what was recommended in the earlier plans of the first section, permanent sys-tem of highways. The dangerous conditions at Carroll Avenue cited in this bill could be remedied by the depression of that avenue, which would, however, cost a considerable sum for grading and for dam-

age to property.... "Magnolia Avenue, as shown on the enclosed map, what the District line, and it can thus be seen that the benefits arising from the opening of the proposed highway would lie mainly in Maryland, If half the amount of benefits were assessed on the District side it would occasion great hardship to property owners, as the assess-ment would be made against a very few lots between the Baltimore and Ohlo Rallroad and Magnolia Avenue. It is, therefore, suggested that the parties living in Maryland who are desirous of having this extension made might be induced to de-

posit their share of the assessment.
"The estimated cost of the land to be ral ~ is \$11.500. The opening up of this highway would not, of course, be of any atility as look as the Baltimore and Ohio Railroad stoos as a barrier in the middle of the opening. An undergrade crossing would necessarily follow and the estimated cost of same would be in the neighborhood

Opening of Welling Place. "House bill 6773, Fifty-sixth Congress,

first session, 'Authorizing the extension of Welling Place.

The main object of the bill seems to be the establishment of an east and west thoroughfare between Fourteenth Street and the sul-division of Meridian Hill. At tention is invited to the fact that Euclid Place extended would form a more direct extension with Sixteenth Street than the connection proposed by this bill, which is not contemplated west of Fifteenth Street There are it is believed, no dwellings in the way of the extension in either Euclid or Welling Places. White Welling Place should eventually be extended to Sixteenth Street it might perhaps be advisable at first to apply the money which would be required for this extension to the extension of Euclid Place from University Place

sion of Euclid Place from University Place to Fifteenth Street, which would form a complete roadway to Sixteenth Street.

"The extension would cost in the way of damages about \$20,600. Very little grading would be necessary to place the extended street in passable condition.

"House bill 3501, Fifty-sixth Congress, foot session, For he extension of Very first session, For the extension of Ver-

ment Avenue.

"The extension would pass through old sub-division laid out with very narrow streets, and the avenue, if extended, would offer an inlet to the city from Brightwood Avenue, it would thus operate to relice the lower end of that avenue from congestion, which now exists at that walls. The travel on Brightwood Avenue. point. The travel on Brightwood Avenue is very heavy. Owing to the street car tracks in the avenue and the amount of business traffic at the lower end of the street, there is a difficulty, frequently, in vehicles passing each other. This, it is believed, would be greatly relieved by the extension, which would also afford a more direct route to the centre of the city.

"About two years ago condemnation pro-ceedings were had for a portion of the extension, and, basing an estimate on the awards then made, the extension would cost \$111,000 for the land alone. The improvements would cost about \$50,000. There are some sixty frame dwellings within the lines of the extension, and the taking of these would add very materially to the improvement of the section, many of the houses being worth not more than 1600 being worth not more than \$600

"About \$3,000 would be required for grading and \$2,500 additional to put in passable condition. The rate of grade is not a very favorable one, but is about the same as the present grade of Bright-wood Avenue just above Grant Street.

For M Street Northeast.

Street northeast.

or promised for donation, on the lines laid the expenditure is in the former case down in this bill. The portion to be congressly in excess of the benefit derived in demned would be a small amount near the Bladensburg Road, and the estimated cost of condemning it would be \$5,000. An expensive item in such an extension and its use would be the heldfurger of the such as a small amount near the latter."

The appropriation requested for the support of these words for the remainder of the current fiscal year, \$1,000, Dr. Wood-ward thinks reasonable and Dr. Wood-ward thinks reasonable.

"A highway through this section is much a highway integrate this section is much needed for local purposes, as the farms lying in this section have now no means of communication with the city except through private lanes and over farms. The proposed extension would be of material value to the property in this section, and also increase the taxation returns there-

Lyles Street Opening. House hill 8617, 'To authorize the con demnation of so much of the west end of Lyles Street as is necessary to make

an opening from Wisconsin Avenue and corner of Grant Road in the District of "The permanent system of highway plans for this section are shown on the may by red lines, and it will be noticed that these plans do not contemplate the extension of this street, and that the land lies within the proposed location of Forlicth Street. Lyles Place has, at present, a connection with the Tenleytoxa Road, which will serve all purposes of travel for some years to come. The extension proposed is also shown in blue on the general map herewith and is num-

the general map herewith and is no

the general map herewith and is num-bered 12.

"The estimated cost of the extension is, for land \$2,500, and improvements \$1,500, a total of \$4,200. Very little grading is necessary to make the extension.

"House bill \$653, For the widening and extensing of Warder Avenue, opening a highway through Whitney Close along Soldiers" Home Grounds, and for other purposes,

Warder Avenue is located in the mid HOUSE & HERRMANN,

901-903 Seventh Street Corner of I (Eye) Stree_t.

"Warder Avenue is located in the middle of the sub-division known as Whitney Close and at present has no outlet to the city except by the way of Whitney Avenue. This bill proposes a new outlet to the city by way of Fifth Street in Howard University sub-division, and also connects the avenue with Seventh Street in Petworth. The proposed highway along the Soldlers' Home Grounds would be of great benefit to the sub-division of Whit-

ney Close and would enable holders to face their lots in the of the Soldiers' Home Grounds.

Cost of Warder Avenue The cost of the condemnation of Warder Avenue is estimated at \$28,800, and for the roadway along Soldiers' Home at \$45,700, a total of \$74,570; this estimate including the cost of condemnation of the land in the Soldiers' Home Grounds.

Warder Avenue is at present in an amproved condition and a considerable amount of grading would be necessary to place it on proper grade. The avenue through and along the Soldiers' Home Grounds passes, in one or two places, over a rather rough section, and the cost of grading would be even greater than for Warder Avenue. It may be noted that the opening of the highway along the Soldiers' Home Grounds would have the advantage of facing the houses toward the Home rather than have them abut the The highway would also connec the sub-division of Petworth with Mich-igan Avenue and First Street by a driveway through the reservoir grounds. part of the proposed extension within the Soldiers' Home Grounds, although the bill provides that it be donated, would probamanner as the portion which passes through Whitney Close."

GARFIELD HOSPITAL RELIEF.

ditional Appropriation of \$1,000. The Commissioners have transmitted to committees in Congress on the District of Columbia the draft of a joint resolution for the relief of Garfield Memorial Hospital, with a request for favorable action thereon. It reads as follows:

The framing of the joint resolution and the recommendation of the Commissioners were inspired by the report of the District Health Off or upon a letter written by the secretary of the Garfield Memorial Hospital, in which he stated, in effect, that the appropriation for the treatment of minor contagious diseases at the hospital was exhausted, and that the wards would closed, unless funds to the amount of \$1,000 should be provided.

Dr. Woodward states in his report that from October 11, 1899, to April 12, 1900, both inclusive, there were treated in the wards of the Garfield Memorial Hospital fifty-four cases of diphtheria, seventeen cases of scarlet fever, and twenty cases of measles, covering in all 1.754 hospital days. The entire appropriation of \$3,000, and the The entire appropriation of \$3,000, and the entire income from pay patients, an inconsiderable amount, he says, have been devoted to the support of these wards. The cost of each patient per diem Dr. Woodward figures out at \$1.71, which, in view of the small number of patients treated and the special character, of treatment required, is, in his judgment, a reasonable amount.

Attention is called to the fact, however, that much more than the mere relief of the patient is accomplished in these wards. The treatment of cases there, Dr. Woodward says, diminishes the extent to which the public is exposed to contagious discases. "It frees the families from long quarantine, enabling the wage-carners to continue work and to take care of those dependent upon them for support, who would otherwise in many cases be thrown upon the charity of relatives, friends, or the public. It enables householders to re-lieve themselves of domestic servants suffering from contagious diseases, who would otherwise be in quarantine on their premises, not only without danger, but with benefit to such servants. Finally, it enables proprietors of botsis, apariment houses, and boarding places often to secure the removal of cases of infectious dis-cases from their premises when otherwise it would not be posible to do so. In fact, since the wards for the treatment of minor contagious diseases have been in operation, "House bill 75er, Fifty-sixth Congress, it is difficult to imagine how the com-first session, "For the extension of M Therefore, if the cost of treatment for each "It is understood that all of the land treatment of ordinary hospital cases, the east of Morris' addition has been donated, benefit which the community derives from or promised for donation, on the lines laid the expenditure is in the former case

FUNERAL OF NORMAN NORTH.

The Remains to Be Interred at Ar

The remains of Norman North, of Ana costia, who lost his life in Porto Ricc during the hurricane August 8, 1899, will use bill SUSS, 'For the extension be hild to read at Alling Sussession be highly be at Alling Sussession "House bill SUSS, For the extension of Eighth Street northeast," ...

The opening up of this street would be of great benefit to a large section that has not, at present, lines of easy communication with the city. The grading of the avenue is a very slight matter over its southern half, but the northern portion passes through a very rough section and would require some very heavy cuts and fills. The estimated cost of this extension is, if the land along the entire line should be condemned, about \$57,000. The Cammissioners are informed, however, that there is a reasonable prospect of the draination of the entire portion of the line north of the catholic University Grounds. If this land were to be dedicated the cost would be reduced to something like \$5,000. The Commissioners have the matter under consideration with the authorities of the hurrying to offer assistance to others who be reduced to something like \$4.000. The Cavary which was sent to rotto fitted. Commissioners have the matter under consideration with the authorities of the Catholic University, and it is possible that were perishing that the current oversome arrangement may be made by them so as to reduce this amount. as as to reduce this amount.

"It is believed that the opening up of this avenue would add materially to the property values in this section and the country traversed by it and produce con-

country traver,ed by ft, and produce considerable increase in the taxation resturns. It passes in the vicinity of several large manufacturing concerns, notably, sewer pipe and terra cotta works, and would afford them a delivery to the city by wigno, whereas it is now almost impossible to get their products to the city except by rail.

Mr. North and many triengs in this considerable for some time and received his education. He was a graduate of the high schools here and had been studying medicine at the Columbian University. Before his substitute to Dr. Blackburn, special pathologist at the Government Hospital for the insane.
